Video Contact Center
Elevate Your Video Communication Experience with Cutting Edge Technology and Create a Lasting Impact

Enhance Customer Satisfaction and Loyalty

Take Your Customer Service to the Next Level with Video Communication. Go beyond traditional text and voice communication by establishing instant and face-to-face communication with your customers through video calls. Enhance customer satisfaction and loyalty by providing a more personalized service experience.

Protect Your Data with Secure Video Calls

Safeguard your data by utilizing our local data center in Turkey or on-premise deployment options, ensuring compliance with your legal obligations. Maximize the security of your communication to the highest level with advanced security features such as end-to-end encryption and recording confirmation.

Have a Unique Communication Prototype to Enhance Productivity

Provide your customers and your field teams with the opportunity to make video calls at any location and through any device as they wish, without requiring an application or plug-in. Monitor your calls by making use of real-time analysis and reports, and assess your productivity and service quality on instant basis. Utulize your tacit knowledge and assets by video colloboration in the most effective manner to boost operational productivity.

Online Video Interview Platform
Digitalize Your Recruitment Processes with Artificial Intelligence (AI), Find the Right Candidate Faster!

## Optimize Your Recruitment Processes with Video and Online Interviews

Enable candidates to complete interviews at their convenience by specifying time slots in your interview invitations. Enable them to respond to AI-generated questions via recorded video, accessible from any location and device. Utilize AI to analyze the recorded videos, conduct preliminary evaluations, and create shortlists of the most suitable candidates. Plan online interviews with shortlisted candidates and conduct face-to-face meetings digitally through the platform. Streamline the selection process to quickly and effectively identify the best-fit candidates for the position.

Simplify your evaluation processes with advanced Artificial Intelligence (AI) algorithms

Measure candidates' overall emotional responses and convert recorded video responses into real-time text using speech-to-text technology. Create customized question pools tailored to specific departments, positions, and organizational needs with AI-driven solutions, and present these questions to candidates. Analyze and score their responses using AI to conduct efficient evaluations and accelerate the process. This approach ensures an objective assessment of whether candidates meet the requirements of the position.

Manage Your interview Processes from a Single Panel and Generate Detailed Reports

Enrich your evaluation process by adding your own comments and scores, complementing AI-based scoring for a more comprehensive assessment. Build a custom CV pool by uploading candidate resumes into the system. Optimize your hiring processes with AI-driven video interview reports, online interview reports, and candidate reports—all accessible from a single panel. Save time and reduce costs through streamlined assessment and decision-making.

Corporate Wiki
Streamline Your Corporate Information, Manage It Effortlessly and Promote Collaboration

### Enhance productivity in handling internal information

Establish a centralized platform for your employees to easily retrieve internal information such as announcements, policies, procedures, and FAQs. Encourage team interaction and expedite decision-making through improved communication. Save time by reducing redundant queries, and boost efficiency by consolidating information from various departments.

Effortlessly Manage Information and Encourage Collaboration

The user-friendly design allows you to add, update, and share content seamlessly without the need for additional applications or plugins. Encourage collaboration among teams by allowing employees to edit content, share ideas, and provide feedback directly on the platform.

Instant Access to Information through Smart Search and Announcements

Empower your employees to find information quickly using keywords and tags. Highlight critical information and popular topics through announcements and categories. Stay productive by monitoring search trends in real-time and updating content accordingly.
