Remote Health Care Services Your Solution Partner For Video Calls
Reduce Your Costs and Boost Efficiency and Customer Satisfaction with Us

Ensure Compliance with Applicable Regulations through Flexible Installation

Protect your data by utilizing either our local data center in Turkey or on-premise deployment options, ensuring compliance with the security and privacy obligations as required by legal authorities.

Protect Your Data By Secure Communication

Maximize the security of your confidential and private communications by making use of the detailed security settings such as end-to-end encryption, password protection, personal link, waiting room and video record confirmation.

Enhance Satisfaction With Ease of Use

Provide your clients with the opportunity to make video calls at any location and through any device as they wish, without requiring an application or plug-in. Enrich interaction thanks to the features such as screen sharing, call record, white board, chat, simultaneous translation, survey, remote desktop management.

Stay One Step Ahead with Fast, Reliable, and Innovative Solutions

User-Friendly Interface

Share the call link with your clients, and use virtual or blurred backgrounds during your calls, as you wish. Record your calls on your local server or cloud server for archiving and sharing such calls upon obtainment of a consent as prescribed by the Law on Protection of Personal Data (LPPD).

Customization

Seamlessly connect to your existing applications through its API-based structure. Incorporate your corporate logo and domain name and personalize your call invitations and notifications with messages and texts specific to your enterprise.

Security

Keep your communication secure by making use of the detailed security settings such as end-to-end encryption, password protection, personal link, waiting room and image record confirmation.

High-Quality Video and Audio

Have your calls with high-quality video and audio. Adapt to the changing network conditions automatically by optimizing the video quality.

Integration

Enable login through your corporate accounts by means of LDAP/Active Directory and SSO integration. Enable your users to schedule meetings by making use of their calendars through Outlook integration in addition to your corporate e-mails.

High Interaction

Enhance interaction through features such as screen sharing, call recording, whiteboard, chat, simultaneous translation, surveys, and remote desktop management.

Detailed Reporting

Evaluate the performance of the calls thanks to the detailed information and reports such as the total and client-based participation periods, number of the calls, camera and microphone uses, shared contents and total messages.

Scalable Configuration

Seamlessly adapt to the growing number of users and traffic load with its scalable structure that aligns with your specific needs.
